## **Privacy Policy for First Choice Computers**

First Choice Computers has always been a company that understands the importance of privacy and security. We help implement PCI Compliancy Policy's for Many companies and live by a strict policy that we do not sale or share any client's information in any way with anyone. That information breech has never been a source of revenue for us and never will be. We take pride in our network security and firewall, and security gateway implementations, as well as cyber security protection for many of our clients. All this goes hand in hand to First Choice Computers and we will always be here to protect and guard you from these issues and will never allow any of your information to get out in any way!

Rick Gray  
CEO First Choice Computers
